

Solution Brief

# Transition to Cloud Workshop

Empower your people to be productive and secure from anywhere

## Overview

In March 2020, hybrid working went from niche to normal, in days. It was probably the fastest change to our working behaviour we've ever seen. This unprecedented event has led to a shift in priorities – not just for individuals but also for organisations. Hybrid working is here to stay, so businesses need a long-term plan to evolve any temporary fixes and put permanent strategies in place to build resilience for their people, teams and organisation.

- Insight Microsoft 365 Security Mini-Audit

## Our solution

We'll discuss the scenarios available with Microsoft 365 to enable secure work from anywhere. We'll evaluate your options and leave you with a concrete deployment plan and next steps.

This two-day workshop is focused on identifying secure work from anywhere scenarios that align to your business needs and address the following:

Envision secure work from anywhere	Implementation planning	Activation and adoption planning
Understand the customer objectives and envision your priority scenarios	Develop a plan to implement Microsoft Teams and foundational security for users, devices, apps and data	Define a plan including risks and mitigations for a successful deployment and adoption

## What to expect

We'll work with you to:

- Understand your secure work from anywhere goals and objectives
- Envision priority scenarios with a customer immersion experience
- Define existing and desired work from anywhere scenarios
- Identify potential blockers and challenges
- Engage in an environmental and workload analysis
- Provide a list of actionable recommendations to implement hybrid identity, Microsoft Teams, and security
- Develop a joint action plan based key results, recommendations, and next steps
- Provide a Microsoft Teams and Security Adoption kit, including end user training, workload introductions, and support resources

## We'll customise the workshop based on your organisation's needs

Engagement set-up			
			
Objectives and Scenarios	Customer Immersion Experience	Deployment & Adoption Planning	Key results, recommendations, and next steps

## Business outcomes

With this two-day workshop, we'll show you how you can use Microsoft technologies to:

Provide meeting and collaboration experiences to connect teams remotely and onsite	Secure your business with technology you can trust	Consolidate to one cost-effective solution to simplify IT management and reduce spending
